

LONG YEARS AGO

September 11, 1903

Mr. Cooper shot the biggest wild duck of the season this week. It weighed 4 1-2 pounds.

A very heavy frost on September 4th damaged gardens and crops.

Mr. W.K. Wickwire is getting plans drawn for a mansion on his ranch at the Dog Pound.

Mr. Bouck and daughter have arrived in the district and expect to take up residence on their home-stand soon.

Mr. Stuart of Neapolis informs us that his creamery is about ready for operation.

Mr. Ed Bahr is looking over the district for a location.

Witwer Bros. sold their ranch to some American for the large sum of \$6,000.

The latest addition to our town is another paper, The Didsbury Courier, which is published for Mr. Thomas Gaddes.

PLEASE PHONE OR BRING IN YOUR NEWS ITEMS

This newspaper cannot make a house to house canvass for news, but it is always glad to have it phoned or handed in. We want all the news! We are just as pleased to mention your guests or your visit as to mention doings of your neighbors—but maybe your neighbors co-operated with us in getting the facts. Please let us have your news items. Our columns are always open to them. And remember they must be in before Tuesday noon, if at all possible, and not later than 5 p.m. Tuesday, to ensure publication in that week's issue.

EVERY GREETING CARD YOU SEND HELPS TO MAKE A BETTER FRIEND

There is no more admirable trait of character than being thoughtful — and there is nothing more thoughtful than sending greeting cards.

In our card department we carry a complete line of Coult's greeting cards for all occasions. Next time you need a card, come in. You'll find what you want in a jiffy.

RUGBY W.I. MEETING HELD AT HOME OF MRS. L. KREBS

The Rugby W.I. meeting this month was held at the home of Mrs. L. Krebs. 12 members and several visitors were present. It was decided to send the usual donation to the Jam Fund, and also to make a donation of \$30 towards some refurbishing for the W.I. hospital room. Discussion took place on the coming "Clothes Drive For Refugees" and it was decided to gather all the garments possible for this purpose. So friends and neighbors, what can you spare? Clothes must be clean and in good repair, with fastenings all in place and a spool of thread or a button or two tucked away in a pocket, may prove a very pleasant surprise to someone; such things are mighty scarce over there, they say. Parcels may be left with the secretary, of the vice president, Mrs. Hogg.

At next month's meeting, which will be held at the home of Mrs. Cowitz, a large size quilt is to be made for this drive, so don't forget to bring scissors and thimble with you. This meeting is also filling two ditty bags for the Navy League.

The Branch closed with the National Anthem and lunch was then served.

CSM E.C. Carleton, Gnr. A. E. Edwards, Gnr. C.C. Robertson of Didsbury are due to arrive in Calgary Wednesday afternoon.

DIDSBURY SCHOOLS OPEN MONDAY FOR FALL TERM

Didsbury public and high schools opened Monday morning for the fall term and caretaker Sam Franklin had the buildings sparkling for the occasion. There has been no change in the teaching staff this year and the following are the teachers: Mr. A. Reiber, Mrs. Willison, Miss Vickery, Mr. Wiggins, Mr. Plannagan, Miss Innis, Mrs. Dautins, Mrs. Staunton and Miss Wilson.

DIDSBURY GAME PRESERVE DESCRIBED IN GAZETTE

The August 31 issue of The Alberta Gazette lists among the game preserves of the province The Didsbury Game Preserve, and states: "No person shall at any time hunt, shoot at, take or kill any big game, fur-bearing animals or game birds in that part of the Province known as the Didsbury Game Preserve, described as follows: "All those parcels or tracts of land, situate, lying or being in Sections 3, 4, 9 and 10, in Township 32, Range 4, west of the Fifth Meridian, including drainage of the Little Red Deer River and its tributaries within the above mentioned sections."

NOTES FROM THE EAST

A large number of friends and neighbors gathered at the home of Mr. and Mrs. Louis Kohut to give them a surprise farewell on Wednesday evening, August 29. And a real surprise it was. The evening was spent in visiting and music by Kenneth Burns on the violin, accompanied by different volunteers on the organ. A few favorite numbers were sung by all. Mr. Morash presented Mr. and Mrs. Kohut with a coffee table on behalf of those gathered, and wished them happiness and contentment in their new home in Calgary. Mr. Kohut thanked his many friends and said if he had been told twenty-five years ago he would have so many friends gather to surprise him and Mrs. Kohut, he would not have believed it. He also said if he had done anything wrong he wished that he would forgive him. The gathering then sang "For they are jolly good fellows" and "Auld Lang Syne". A lovely lunch was served by the hostess, Mrs. Arthur Gebers, assisted by Mrs. Ed McNeil, and the evening closed with the bidding of farewell to Mr. and Mrs. Kohut.

Mrs. Harold Shells returned from Hanna last Sunday evening. Misses Gladys and Lois Shells left Friday to reside with their grandmother, Mrs. Downing, in Calgary where they will attend public school.

Mr. and Mrs. Clifford Nelson and family left Saturday for their home in Edmonton. They have been visiting with her father, Mr. Hugh McLean.

Mrs. Dowell returned home from the United States on Thursday, where she attended her father's funeral.

We are sorry to hear that Garth Krause had the misfortune to sprain his wrist. It will be handy to be living so close to school. Garth, no horse to ride with a sore arm.

Gordon Coates had a duel with a rain, but Gordie lost out. I'm afraid. At any rate he has a patch on one eye.

The wedding dance put on by Eric Atkinson was well attended. Music was supplied by Si Hopkins of Calgary. Mr. and Mrs. Atkinson were recipients of many useful and lovely gifts. We wish the bride and groom success and happiness along their new road of life. The newly weds will reside north of the Mt. View hall on the groom's farm.

Mr. Bruce Shells intends to start thrashing on his home place this Thursday.

M.B.C. CHURCH NOTES

Sunday evening, Sept. 16th, at 7:45 the Young People with their regular meeting. Rev. D.C. Ely, pastor, who spent many years in Palestine as a missionary, will show pictures of the Holy Land. These will be of special interest to all, young and old. A warm welcome awaits you.

FINDS WATCH LOST IN FIELD 32 YEARS AGO

While working the summer fallow on the Chas. Brado farm, E. W. Reinhardt found a watch that was lost in 1913.

The time piece was lost in the field. Mr. Brado's uncle when he was plowing, and despite the 33 years in the ground, the watch was in a fairly good state of repair, and while the crystal was broken and a little rust had formed around the pinion for the hands, the main works were intact and with a good cleaning should be serviceable again.

FALLEN TIMBER NOTES

Mr. and Mrs. Alex Moore accompanied by Mr. and Mrs. Trigby Halverson of Bergen spent the week end holidaying in Banff.

Rev. Mrs. C. B. Moore, Four Square Evangelist of Calgary, held her usual service in the Fallen Timber school house on Sunday last.

A wedding dance will be held in honor of Mr. and Mrs. Joe Teynor, newly weds, in the near future.

Fallen Timber school opened on Monday last with Mrs. J. H. Cooper as teacher.

Among the young people going out of the district to attend High School are: Don McMillen, going to Red Deer; Dorothy Moore of Bergen and Olive Cooper, Glen Cooper and Harry W. McGaffin of Fulton Timber going to Calgary.

Fishermen from outside points report success in the Fallen Timber.

The Blueberry crop in this district is a failure this year.

Art Rothwell of Didsbury was a business visitor in this vicinity on Saturday last.

Three cars coming in late Saturday evening report the Mandalay one of the Burnham Road not so hot.

Miss Susie Bruns of Carstairs, who has been visiting at the home of her aunt, Mrs. Joe McGaffin, has returned to her home.

Petty Officer Fred Taylor of the Canadian Frigate Port Colborn, is visiting in the Fallen Timber district.

We also notice that Sgt. Les Evans of the Ninth U.S. Army is visiting around Elkton.

NOTES FROM THE WEST

Mrs. C. Konshuh and Mrs. A. L. Hogg were dinner guests with Mrs. O. Krebs on Thursday.

Mrs. Melniss returned Saturday from the north where she has been visiting for the past week.

Mrs. Prosser of Calgary spent a few days visiting with her brother and his wife, Mr. and Mrs. Bert Smith, and seeing her mother, Mrs. C. Brown, a patient in the Didsbury General Hospital.

Miss Inez Papke returned from the coast on Thursday last. Leonard Papke was a patient in the Didsbury hospital for a couple of days last week, and LAC N.G. Hogg was admitted Friday and is still there.

Mrs. P. Luft opened the Elkton school on Monday, till such time as a permanent teacher can be secured, and Mrs. Vipond started Rugby. Teachers seem to be scarcer than last year.

A very light white frost was to be seen early Sunday morning, but it hadn't seen to have done any damage.

Mr. and Mrs. J. Woolway of Red Deer visited with Mr. and Mrs. J. Hoesgood Sr. on Sunday.

Mrs. Ed Parker, who underwent a major operation in the General Hospital on Thursday last, is reported as doing as well as can be expected.

AUGUST MEETING OF WESTCOTT W. I.

Mrs. J. Hughes was hostess to 16 visitors and 10 members for the August meeting of the Westcott W. I.

Mrs. Beaudistel and Mrs. Klinek Sp. were present and responsible for two ditty bags to be filled.

A \$5.00 donation was made for jam for Britain.

Mr. and Mrs. Hogg was responded to by naming your favorite flower.

Miss Afford of Red Deer gave a very interesting talk on home helps, stain removal, and demonstrated stenciling.

Emma Luft won the draw, and Mrs. Swanby, having the most points, won the flower contest with Mrs. Klinek Sr. second.

M.D. Mountain View No. 49 Requests 19 New Bridges

W. H. PAYNE BUYS HOSPITAL BUILDING; R. R. DUQUETTE GETS NURSES' HOME

A petition to grade a road between 23-26 and 22-27, 28-1-5 was received from residents in that area, and the Council of the Municipal District of Mountain View No. 49 at its regular meeting on Thursday, September 6th, decided to construct the road this fall if weather permits and machinery is available.

The Department of Public Works advised that material had been delivered for a bridge on Sec. 9-30-45, near Cremona.

Notice was received of a Pound Sale held by Poundkeeper J.R. Wikerson, of a black saddle horse and a roan mare.

A communication from the Central Alberta Ass'n of Municipal Districts advised that the annual meeting will be held at Red Deer on October 4th, and Reeve A. L. Hogg and Sec. Treas. A. Brusso were appointed delegates to attend.

The District Engineer asked for a list of bridges that would be needed next year and the council requested that 19 new bridges be constructed within the Municipal District of Mountain View.

Permission was granted to Gas & Oil Products Ltd. to establish a bulk warehouse in Cremona.

Notice from the Dept. advised that four Old Age Pension applications had been approved and granted. Also one Tax Consolidation application was approved.

Bids were opened for the purchase of the old hospital building, and the nurses home. Council accepted the bid of Mr. R.R. Duquette for the nurses home; and of Mr. W. H. Payne for the old hospital building, and the secretary was instructed to have the necessary documents prepared for transfer of buildings.

It was reported that a contract had been let to Mr. R. Currie to place gravel on the Westcott road, and work is now in progress; the Sundre Construction Co. is crushing gravel in the Olds pit for graveling projects around Olds; one gravel crew is working in the Eagle Hill district; work west of Carstairs has been completed; a considerable portion of graveling in the Crossfield area has been done; another crew is working east of Crossfield, and a crew is starting

LOCAL NEWS ITEMS

Flying Officer A. J. Bular, and LAC L.E. McCafferty of Didsbury are listed among the boys due to arrive in Calgary September 15th from overseas.

Ernie Wilkins has purchased the Imperial cafe and he and his brother are now hard at work cleaning up the premises in town preparatory to opening up for business.

Mrs. Stanley Brown arrived on Monday from Victoria and is at present visiting at the home of Mr. and Mrs. Roger Barrett.

Mr. and Mrs. F. S. Rouleau arrived in Didsbury from Enderby, B.C. on Tuesday and are visiting with the former's son, Mr. and Mrs. E. J. Rouleau, and family. F. S. Rouleau is editor and publisher of the Enderby Commoner.

Judy Evans of Calgary is visiting with her grandparents, Dr. and Mrs. W. G. Evans.

Mr. L.A. Berscht went to Edmonton Monday to bring back his wife and daughter, and Mr. and Mrs. Berscht have now taken up residence in their home in Didsbury.

The hunting season for ducks and geese in this part of Alberta opens on Saturday, September 15th, and ducks are reported fairly plentiful in this district.

Mr. Marve Evernden, who has recently been discharged from the services, has taken a position in the local Builders' Hardware Store as second man, replacing Mr. Clayton Johnson who has held this position for about three years.

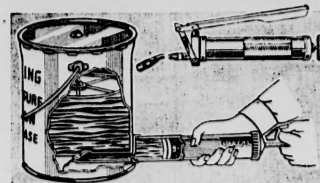

Glen Levagood, RCNVR, is home on 30-day leave visiting with his parents, Mr. and Mrs. Ira Levagood, west of town. Glen expects to get his discharge shortly.

east of Didsbury, but not making much progress.

Grading crews are working in the Eagle Hill district; west of Crossfield; East of Carstairs; and at Cremona.

Accounts and pay sheets completed the business of the meeting.

Grave Problems Confronting The Liberated Countries Of Europe As Winter Approaches

(By Ross Munro)

THE main source from which the United Nations Relief and Rehabilitation Administration hopes to obtain an increase in urgently-needed supplies for Europe is the United States and to a lesser extent Canada, although additional supplies are expected from all other U.N.R.R.A. countries that can send goods, it was learned.

Herbert H. Lehman, director general of the administration, gave an outspoken warning at a press conference in London that the liberated countries of Europe cannot escape the most severe privations this winter unless the countries which were not involved send expanding supplies in the months ahead.

At present the United States supplies the largest amount of goods and Canada is second. A considerable increase is expected to come from New Zealand, Australia, Brazil and other Latin American countries.

Mr. Lehman said that the U.N.R.R.A. will have to be further belittling in the supply countries, notably Canada and the United States, and emphasized the foodstuffs in shortest supply are meat, fats and dairy products. There also is a major scarcity of textiles.

U.N.R.R.A.'s financial resources also are getting low. Mr. Lehman said the administration's funds will virtually all be obligated by the end of this year and additional funds are required to carry over into next year.

Further appropriations likely will be asked of the member countries at the council meeting. A spokesman said that member countries may be asked to double their contributions—at present one per cent. of the national income of production.

Canada has contributed fully to the U.N.R.R.A. and met all her obligations, expending \$10,000,000 in free exchange as well as being the first member to make full contribution in goods.

Canadian decision on any appeal for doubling the appropriation is likely to depend to a large extent on what the United States does. The Dominion probably will not take on any additional expenditure if her neighbor turns it down, but if the United States accepts Canada likely will fall into line. It is a matter for Congress and Parliament, respectively, to decide.

Mr. Lehman painted a gloomy picture of winter in Europe if sufficient supplies are not forthcoming but said the pressure probably would relax by the 1946 harvest.

While U.N.R.R.A. is only operating its relief and rehabilitation program in Greece, Albania, Yugoslavia, Czechoslovakia, Italy and Poland at present, he said the grant is likely to be faced this winter in western Europe as well, Russia, too, has made a request to the U.N.R.R.A. for relief and rehabilitation which will be considered at the council meeting.

He emphasized one of the greatest needs in addition to coal, food, raw material and building supplies was trucks to distribute the goods. Trucks are likely to be obtained from many surplus in the Mediterranean and northwestern Europe theatres and presumably a good many Canadian army vehicles can be turned over to the U.N.R.R.A.

There is absolutely no potential source of surplus food supply in Europe, Mr. Lehman said. In answer to a question, he said no application had been made to military authorities for permission to go into former enemy countries to obtain supplies.

Lt.-Col. Tweedsmuir

Son of Canada's Late Governor-General Retires From Canadian Active Army

Lt.-Col. Lord Tweedsmuir, O.B.E., 33, of Ottawa, is retiring from the Canadian Active Army, National Defence Headquarters announced. Lord Tweedsmuir, son of Canada's late Governor General, was officer commanding the Hastings and Prince Edward Regiment in Sicily in 1945, when wounded in the action resulting in the capture of Agira, one of the key victories of the Canadians in that campaign. In July, last, he was decorated by His Majesty at a Buckingham Palace investiture, with the Order of the British Empire.

In civil life, Lord Tweedsmuir is an executive of the Hudson Bay Company. He has been overseas since 1929 and served in staff appointments; he commanded a company of Seaforth's of Canada, was a general staff officer at 1st Canadian Army Headquarters, and then was posted to the H. and P.E. Regiment (The Highlanders) as second in command. He took over the battalion when the O.C. was wounded and carried on till he himself was evacuated with wounds.

Recently he has been employed as a General Staff Officer grade one, on liaison between Canadian and British forces.

Richard the Lionhearted is believed to have invented tarring and feathering as a punishment.

In 50 B.C., the firing of damp straw to smoke out enemy positions was common.

German Spy

An Interesting Story Of Counter-Espionage Work Now Revealed

The German spy captured in the Great Peninsula Nov. 9, 1942, shortly after he landed from a U-boat, was spared death by a firing squad and instead was pressed into British counter-espionage work, it was permitted to disclose.

At present the spy is reported to be working with the Allied command on war crimes and is being used to spot Nazi officials of the lower brackets, especially those who operated as betrayers of European underground movements and who had anything to do with the execution of Allied prisoners of war.

Previously, censorship had only allowed disclosure of the manner in which Lieut. Werner Janowski, 27, was captured. Quick-thinking New Carlisle, Que., citizens found the story of the stranger who suddenly appeared in their midst did not tally and finally when he produced an old-time Canadian two dollar bill they called it a police matter.

Now it can be told that the spy was taken to Montreal and promised reprieve from a firing squad for counter-espionage service.

He was given the job of feeding Nazi secret service headquarters in Hamburg with innocuous information and sometimes he was allowed to give them news of Canadian ship sinkings and other such information slightly ahead of general release in Canada.

Meanwhile, he received messages from Hamburg—on the same portable radio he had brought ashore with him in the Gaspe—on Nazi espionage activities in Canada and the United States.

British spies checked up on the German in Hamburg to "keep him honest." A "mountie" in Montreal studied his style in sending signals and eventually took over the delicate task of ghosting for the German.

R.C.M.P., who kept the spy under lock and key for this early period, have never disclosed the nature of the information they were able to obtain. However, it has been reported that they were able to put under quiet watch a score of agents in Canada and the United States.

After a few months the spy was transferred to Britain at the request of British intelligence where he continued counter-espionage of an undisclosed nature.

The historic clock in Guildford's High street, removed for safekeeping during the war, will be put back soon.

Gallery Of War Planes

FIFTEEN MAIN AIRCRAFT TYPES made in Canada which have played a big part in the war against the aggressor nations are shown. These are the planes into which the genius of an industry has been poured, an industry which hardly existed before the war. Each plane of each type was, generally speaking, a better aircraft than the one which came off the assembly line ahead of it. Not only were pilot and crew suggestions, whether in training or combat, embodied in new ships but also the workers were encouraged to submit their own bright ideas for improvement or for better, faster ways of doing the job. It is now estimated by the Aircraft Industry Relations Committee that workers' own suggestions, calculated on the annual saving in their own plant, cut the overall production expense by \$816,336. As well as having the satisfaction of having an outlet for their ideas, the workers have received awards amounting to \$114,770.

An Interesting Find

Excavation On Vancouver Island Uncovered Mound Of Great Age

A. E. Pickford of the British Columbia government museum staff said that a mound spotted near Duncan on Vancouver Island may be more than 1,000 years old and belong to a "remote period of culture".

Mr. Pickford conducted the excavation at the Camute Camakien mound near a burial place on the Camakien Indian reserve. The mound is five feet, six inches high at the centre and from 33 to 38 feet in diameter.

The excavation disclosed a stone cyst, circular in shape and with an inside diameter of three feet. The cyst was made from large, natural slabs of rock varying from pieces two feet by one foot by four inches to smaller pieces of less regular shape.

Mr. Pickford said he was hoping to find human bones or implements inside the cyst that would have given some clue to the ancients who were supposed to have lived on the coast before the Indians. But no relics or human bones had been found. Fine ash found in the excavation might have filtered through the dome.

He said presence of the ash indicated there had been ceremonial cremation before burial.

He suggested the location of the mound gives the impression that it was constructed to record "some outstanding event or tragedy of major importance" as well as the impression of great antiquity.

Her Lucky Number

Thirteen Has No Terror For Sault Ste. Marie Woman

A Sault Ste. Marie woman, Mrs. A. Tonner, was a passenger on the *Hamonic* when it took fire at Point Edward, Mrs. Tonner came to Canada in 1912, is the seventh daughter of a family of thirteen, took her thirteenth trip on the Great Lakes that week which was the thirteenth trip of the *S.S. Hamonic* this summer. The *Sault Daily Star* added that her phone number is 1312-R, and her library card number is 1300. However, she had the luck to have been up and around when the early morning fire started and got off safely without much trouble. So the 13 isn't all bad.—Port Arthur News-Chronicle.

No matter how well things may be ordered in the postwar world, most of us will have to work if all of us are to eat.

Numerous Flowering Plants Are Found Growing In The Vast Spaces Of The Far North

ICE, snow, Eskimos and polar bears—that is the popular mental picture of the vast spaces of the Far North. Yet as far north as land reaches toward the pole, numerous species of flowering plants have been found by explorers. The Danish explorer Dr. Lauge Koch found flowers in full bloom less than 400 miles from the North Pole.

National Freedom

Seven Tests Which Have Been Outlined By Winston Churchill

Through all the ages men have yearned for freedom, valuing it the more the less they had of it. Often enough they have had small understanding of what it was and what it entailed. Freedom has been the cry of the ignorant and vicious as well as of men of good will. The ignorant and misguided sometimes conceived a freedom that was for them alone the freedom to take freedom from someone else. The vicious have thought of it as an easy catch phrase that they could use to bedevil their devils ends. So it behooves us to get our thinking clear and, especially in these days, when we are hoping to make a free world, to know what freedom is and what are its obligations.

Winston Churchill, who has fought for liberty as long and as valiantly as any man in history, who has had more power than most to put thoughts into graphic words, has outlined seven tests which suggest the essentials that any nation must have if it is to be truly free. They were jotted down as a rough guide when he was in the United States, where the problems of the Balkans that have so frequently jeopardized the peace of Europe.

They are worth consideration, not only because of the world problems that face us but lest sometime in our own somewhat confused thinking we might find Canada straying from this cool appraisal of the essentials of freedom. These then are the testing questions:

Is there the right to free expression of opinion, and of opposition and criticism of the government of the day?

Have the people the right to turn out a government of which they disapprove, and are constitutional means provided by which they can make their will apparent?

Are there courts of justice free from violence by the Executive, and free of all taint of mob violence and all association with any particular political parties?

Will these courts administer open and well-established laws which are associated in the human mind with the broad principles of decency and justice?

Will there be fair play for poor as well as for rich, for private persons as well as for government officials? Will the rights of the individual be subject to his duties to the State, be maintained and ascertained and enforced?

Is the ordinary peasant or workman, earning a living by daily toil and striving to bring up a family, free from the fear that some grim police organization, under the control of a single party, like the Gestapo parties, will tap him on the shoulder and will pack him off without fair or open trial to bondage or ill-treatment?

These are the conditions of national freedom.

As we check them against a world of nations, it is very easy to realize how few nations there are that can answer yes to every test.

It is not difficult to realize how easily some of these essentials might be lost to us. And it is easier to understand the long process of education that must intervene before all countries can join with the democracies of the English tongue as truly free nations and truly free men.

Plenty Of Mascots

Royal Canadian Navy's La Hulloise Had More Than Her Share

When she was running the Atlantic convoy lanes H.M.C.S. La Hulloise claimed distinction as the "most-densely-packed-with-mascots" ship in the Royal Canadian Navy—and well she might.

When La Hulloise headed back to Canada on her last run she had five aboard—all dogs.

One La Hulloise sailor on shore leave at Gibraltar even tried to bring one of the cock's famed "rock mice" aboard—and almost succeeded. Unfortunately he tripped while carrying the ape along the jetty and the beast caught a quick one-two and went jibbering to freedom.

INSULT TO ANIMALS

A complaint was made by criminals to the Norwegian Society for the Protection of Animals into a protest. "Animals are not as human," the society said. "War criminals ought to be designated as devils."

Bread baking, or the preparation of cakes from flour or parched grain by means of heat, is one of the most ancient arts.

Spring comes with incredible speed in the remote latitudes of sub-Arctic Canada. In one area, myriads of beautiful flowers were found two weeks after dog teams had been driven over the frozen snow.

Prettiest and most conspicuous of Arctic flowers is the Arctic lupine. In July it covers miles of so-called "barren" north of Great Bear Lake. When these blue, hyacinth-like blossoms are out, the lupine fields can be seen from miles away.

For two weeks in July, too, the Arctic heather comes to life with tiny white bells of bloom. There are meadows not far from the shores of the Arctic Sea where a floral rarity flourishes—a white-flowered buttercup. Miniature daisies thrive here, also, and a diminutive rhododendron. Immense cabbage and Brussels potatoes have been exhibited proudly by the clergy of the mission at Fort Good Hope, on the Mackenzie River, almost touching the Arctic Circle.

More and more naturalists and gardeners are growing sunflowers, not only for a cheerful garden showing but also as a means of providing food for birds. Sunflower seeds being highly popular with many species.

A novel planting trick is that of growing one or two morning glories beside each sunflower—the best variety for the purpose being the heavily blue morning glory. This makes a striking color combination with the blue flowers twined about the six or eight-foot stems of the sunflower plants, crowned with their immense yellow heads.

Bluejays, cardinals, and other wild birds will come for the oily seeds all winter long.

Atomic Energy

Efforts Must Be Made To Keep Explosive Force In Bounds

Some means must be found to control the effects of the atomic bomb, Dr. Roy K. Marshall, director of De la Planetary and associate director of Franklin Institute, said.

Dr. Marshall explained the "high speed particles, parts of the core of the atomic structure of the explosive used, flow into other atoms, such as those in furniture or houses, or the human body itself—to produce explosions."

"When these atoms are released they literally bombard other atoms in the air," he said, adding that without some sort of restraining force such destructive action would "proceed indefinitely."

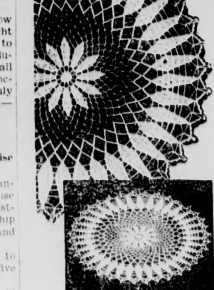

Precise developments of the atomic source of energy will make internal combustion engines "10 years" of the past within six, he predicted.

"We can expect great advances in many fields, including transportation, fuel supplies, electric power and what may even be more important—medicine."

Both dolls—one is 18-inches, the 12½"-take very little thread, and aren't they pretty. Pattern 7151 has crocheted directions, stitches.

Simple, Charming

7151

by Alice Brooks

Proof that crocheted dolls are often among the most attractive—use these dolls (there are two sizes as odd pieces or luncheon sets. Both dolls—one is 18-inches, the 12½"-take very little thread, and aren't they pretty. Pattern 7151 has crocheted directions, stitches.

To obtain this pattern send twenty cents in coins (stamps cannot be accepted) to Household Arts Department, Winnipeg Newspaper Union, 175 McDermott Avenue E., Winnipeg, Man. Be sure to write plainly your Name, Address and Pattern Number.

Translations from documents concerning ancient India show that in the year 2000 B.C. primitive soldiers went to war with an early edition of a flame weapon.

NIMRODS GO FORTH TO PREY

Saturday, September 15th, is the opening day for the shooting of ducks and geese in this part of Alberta and local nimrods are now oiling up their guns for the opening barrage. Experienced hunters now have their stock of shot shells so as not to be caught without ammunition as the season progresses.

So with plenty of gas and ammunition this year, and reports of many ducks in the district, we can look forward to more hunters in the field than for some years. This calls for a timely warning to all who carry guns, and we would say "be careful of your firearms". They are a dangerous weapon in the hands of the novice; and many accidents have occurred among experienced hunters who have been a little careless. It is therefore apparent that if you want to avoid accidents do not carry loaded guns in the car; don't crawl through fences with your gun pointing towards yourself or anyone else; and never point your gun at anything you do not want to kill.

We noticed in the game regulations that Sandhill Cranes are protected again this year in Alberta. To the hunter who goes after geese in the full line of flight this seems a joke. There have been more cranes than geese for the past eight or ten years, and the damage they do to stooked crops is tremendous. There may have been reason 25 years ago to curtail the shooting of cranes, but this is not now the case.

An open season on Sandhill Cranes the same as geese would be welcomed by the goose hunter, and would not seriously deplete the few million cranes now milling over Alberta.

MEAT RATIONING WILL CUT CONSUMPTION 12 PER CENT

One hundred million men, women and children in Europe are in dire need of food. By sending them meat Canadians can help repair war damage to body and mind. The meat ration which has now started allows Canadians a clear 1-13 pound per week, over and above bone. In France the ration is 1-10 pound per week. In England it is 3 ounces of bacon or ham plus a shilling's worth of other meat (bone included) and tupperware worth of canned meat.

Nutrition experts find the proposed Canadian ration enough for a person in any occupation, since there also sufficient quantities of milk, eggs, cheese, fish and poultry. It will cut the present use of meat by about 12 per cent and this will be partly made up by using more fish and poultry.

The plan is the same as when meat was rationed before except for three points:

1. Cooked meats, canned meats and most fancy meats are included.
2. A few cuts have been moved from one group to another; and
3. Tokens will be used, valued at 1-8 coupon.

The numbered brown M coupons in the present ration book will be used and will become good at the rate of one each week. They will be expired only two or three times a year. The unnumbered brown M coupons on temporary ration cards will also be meat coupons and will remain good indefinitely.

The brown M coupons will be worth two pounds carcass weight, which averages 1-13 pounds edible meat.

Although the quantity which can be bought with coupons is the same as in the previous ration, the present ration is more severe because this time nearly all meat is rationed.

India is now Canada's third best customer. During the war the value of Indo-Canadian trade increased

RUSSIA WILL USE BRITISH BUILDING METHODS

Moscow building organizations have asked the United Kingdom for films, plans and literature showing how various types of homes are built in Britain. Russian building experts and technicians will attend a special showing of films of British buildings and estates. The Financial News reports that is anticipated that many British methods will be employed by the Soviet in reconstruction work.

PREPARE FOR NEXT YEAR

Preparation for next year's crop should include a Seed Test. Have a germination test made on your seed—NOW!

Our Agricultural Department make such tests free of charge. If you have an agricultural or marketing problem consult our agent who will refer it to us for consideration and advice.

MULTIPLY A WHISPER BY A MILLION-

AND YOU'VE GOT INFLATION

Let's not deceive ourselves by the belief that the danger is over—just because the war is won. And let's remember that inflation is always followed by deflation with its misery of bankrupt businesses, mortgage foreclosures and unemployment.

It's your job and your savings that are at stake.

The danger of inflation, with its black shadow—deflation—will remain as long as goods are scarce and insufficient to meet demands. That may be 6 months, 12 months, 18 months. Only time will tell. As quickly as controls are unnecessary, they are dropped.

After nearly 6 years of war, industry cannot switch over to normal production of civilian goods by a snap of the fingers. Reconversion takes time. The whole system of raw materials, labor and production has to be re-gear.

In the meantime, price ceilings, rationing and other controls are the safeguard for every one of us. It's everybody's responsibility to help make them work.

SO—Keep on watching your buying. Don't rush to buy scarce goods. Keep on saving your money. Put it into Victory bonds and War Savings certificates.

Keep on supporting wage and price controls, and rationing. Keep on fighting inflation and its black shadow... deflation.

This advertisement is issued by the Government of Canada to emphasize the importance of preventing a further increase in the cost of living now and deflation and unemployment later.

STILL URGENT NEED FOR FOOD IN EUROPE

Some indication of the need for rationing and conserving meat in Canada is outlined in information from the Combined Food Board and from agencies dealing with food distribution throughout the liberated areas in Europe.

While conditions vary in different countries and even in different parts of the same country, the hard fact is that in many parts of liberated Europe, consumption levels are deplorably low. Particularly in the cities the amount of food available is inadequate and provides less than the 2,000 calories a day, which are normally regarded as the minimum.

In some countries conditions have improved, but supplies are still inadequate. In Belgium and Holland, for instance, the ration now gives 1,700 to 1,800 calories a day per person, while in Athens, Greece, the target of 2,000 calories a day is now closely approached. A level of 2,000 calories is, however, no more than emergency level, and is wholly insufficient to maintain a working population. At such a level it is not possible for liberated people to engage upon the tasks of rebuilding their agriculture and industry.

Experience in the war has proved that a much higher level of nutrition is required for the civilian populations who have borne the brunt of war production. In the United States and Canada the av-

erage level of civilian consumption in 1944 was about 3,200 calories a day, and in Britain, 2,923. People engaged in heavy work in these countries consume in excess of 4,000 calories per day.

CANADA'S PORK RECORD

Last year there were 8,863,173 hogs marketed in Canada and exports of pork products to Great Britain and Europe totalled 695,757,400 pounds—the highest production and export in history.

In 1939 there were only 3,706,179 hogs marketed in Canada and overseas exports in the form of bacon and hams totalled 187,824,500 pounds.

When Denmark gets back into the business of bacon exports she will be a keen competitor of Canada as Danish bacon can be shipped into Britain in 48 hours while Canadian bacon must make a nine-day ocean trip to land in the United Kingdom. It is hoped, however, that Canada will retain a market for at least 400 million pounds of bacon in Great Britain and possibly 500 million pounds.

DECLINE IN HOG OUTPUT CUTS FARM INCOME BY \$26,000,000

Representing a gross loss of \$26,000,000 in farm revenue, Alberta will market approximately 1,000,000 less hogs this year than in 1944. That was estimated by Mr. O.S. Longman, deputy minister of agriculture, who pointed out that in ad-

dition to the cash loss in hog revenue there was a loss of a huge market for approximately 20,000,000 bushels of feed grain at double the existing market values.

"Many causes have been advanced for the decline in Alberta's hog production, such as shortage of farm labor, farmers tired of feeding hogs, prices are not satisfactory, price of grain and hog not properly co-related, more profit and less work in grain growing, and so on," said Mr. Longman.

Mr. Longman said if hog production is to play an important part in the future agricultural economy of Alberta, a 2,000,000 hog production program is a reasonable and worthwhile objective.

"The extent of Alberta's hog production plays a major part in determining Canada's exportable surplus and in filling British contracts," said the deputy. "Eighty percent of Alberta's hogs go into export. British has found it necessary to reduce her bacon ration from three ounces to two ounces per person per week, which is said to be due to declining exports from Canada."

"One million hogs from Alberta would provide three ounces per day of meat for 15,000,000 people in Britain for one year or provide all that people of Britain with one extra ounce of pork per week."

Mr. Longman said Alberta can not afford to discard the hog industry.

MEAT RATIONING IS NOW IN EFFECT

As of midnight, SEPTEMBER 9, 1945, it is unlawful for any person to buy rationed meats and for anyone to sell rationed meats except on surrender of valid ration coupons or other ration documents. Sales between suppliers, however, are coupon free until midnight, Saturday, September 15.

MEAT COUPON VALUE CHART

All products shown below are derived from beef, veal, lamb, mutton, pork or combinations of them. Any product or cut shown below has the coupon value indicated, whether or not it contains dressing.

GROUP A - 1 LB. PER COUPON - 2 OZS. PER TOKEN

PORK—Cured

Back (sliced) *boneless*

PORK—Smoked

Back Bacon (sliced)
Side Bacon (sliced) (rind on or rindless)

COOKED MEAT

Any uncouked Group B item (bone in or boneless), when cooked
Pork Butt *boneless*
Pork Ham *boneless*

GROUP B - 1 1/4 LBS. PER COUPON - 3 OZS. PER TOKEN

BEEF—Fresh or Cured

Round Steak or Roast *bone in*
Round Steak or Roast *boneless*
Round Steak, Minced
Sirloin Tip *boneless*
Sirloin Tip, Cubed or Minute
Steaks *boneless*
Sirloin Butt *boneless*
Flank Steak *boneless*
Strip Loin *boneless*
Rib Roast, 7 Rib Bones (rolled whole) *boneless*
Prime Rib Roast, 5 Rib Bones (rolled) *boneless*

Rib Roast Rolled, 6th and 7th Rib Bones—Inside Roll *boneless*
Tenderloin

VEAL—Fresh

Cutlets or Fillet Roast *boneless*
Strip Loin Steaks *boneless*
Front Roll *boneless*
Leg Roll *boneless*
Loin Strip *boneless*
Tenderloin

LAMB or MUTTON—Fresh

Frontquarter (rolled) *boneless*

PORK—Fresh

Butt, Whole, Pieces or Chops (rindless) *bone in*
Butt, Whole, Pieces or Chops (rindless) *boneless*
Ham, Whole, Centre Slices *bone in*
Ham, Whole, Pieces or Slices *bone in*
Picnic, Hockless *boneless*
Back, Whole, Pieces or Slices *boneless*

Side Pork, Whole, Pieces or Slices *boneless*
Trimming, Extra Lean (skinless) *boneless*
Tenderloin

PORK—Cured

Cottage Roll or Butt, Whole or Pieces *boneless*
Picnic Hockless *boneless*
Ham, Whole, Pieces or Slices *bone in* or *boneless*
Ham, Centre Slices *bone in*
Back, Whole or Pieces *boneless*
Side Bacon (rind on or rindless), Whole or Pieces

PORK—Smoked

Picnic, Hockless or Hock on *boneless*

Cottage Roll or Butt, Whole or Pieces *boneless*
Skinless Roll *boneless*
Ham, Centre Slices *bone in*
Ham, Whole (skin on or skinless), Pieces or Slices *bone in* or *boneless*
Back, Whole or Pieces *boneless*
Side Bacon (rind on or rindless), Whole or Pieces

COOKED MEAT

Any uncouked Group C item (bone in or boneless), when cooked.

GROUP C - 2 LBS. PER COUPON - 4 OZS. PER TOKEN

BEEF—Fresh or Cured

Shank, Hindquarter *boneless*
Rump Roast, Round or Square End *bone in*
Sirloin Steak or Roast *bone in*
Flank, Trimmed *bone in*
Porterhouse Steak or Roast *bone in*
T-bone Steak or Roast *bone in*
Wing Steak or Roast *bone in*
Rib Roast, 7 Rib Bones, Whole *bone in*
Prime Rib Roast, 5 Rib Bones *bone in*
Rib Roast, 6th and 7th Rib Bones *bone in*
Rolled Rib Roast, 6th and 7th Rib Bones, Outside Roll *boneless*
Plate Brisket (rolled) *boneless*
Brisket Point (rolled) *boneless*

Roasted Shoulder *boneless*
Short Cross Rib Roast *bone in*
Blade Roast, Blade and Back-strap out *bone in*
Chuck Roast *boneless*
Neck *boneless*
Shank, Centre Cut *bone in*
Shank Meat
Stewing Meat *boneless*
Hamburger

VEAL—Fresh

Shank, Hind *boneless*
Rump, Knuckle Bone out *bone in*
Sirloin Butt Roast *bone in*
Sirloin Butt Steak *bone in*
Leg, Sirloin Butt End *bone in*
Loin, Full Cut, Flank off, Kidney and Suet out *bone in*
Loin, Short Cut, Flank off, Kidney and Suet out *bone in*

Loin Chop or Roast, Tenderloin *boneless*
Loin Chop or Roast, Rib End *bone in*
Round Bone Shoulder Chop or Roast *bone in*
Shank, Front *boneless*
Neck *boneless*
Veal Long for Patties
Stewing Veal

LAMB or MUTTON—Fresh

Sirloin or Chump Chop *bone in*
Loin, Whole, Flank off, Kidney and Suet out *bone in*
Loin Roast or Chop, Tenderloin End *bone in*
Patties

PORK—Fresh
Picnic, Hockless *bone in*
Butt (rind on), Whole, Pieces or Chop *bone in*

Butt (rind on), Whole or Pieces *boneless*
Ham, Trimmed, Whole, Butt End or Shank End *bone in*
Loin, Trimmed (rindless), Whole, Pieces or Chop *bone in*
Side Pork, Whole or Pieces *bone in*

PORK—Cured

Picnic, Hockless *bone in*
Ham, Trimmed, Whole, Butt End or Shank End *bone in*
Side Pork, Whole or Pieces *bone in*
Shoulder Roll (skin on) *boneless*
Dry Salt Belly *boneless*
Dry Salt Back Bacon *boneless*

PORK—Smoked

Picnic, Hockless *bone in*

Ham, Trimmed or Skinned, Whole, Butt End or Shank End *bone in*

FANCY MEAT

Liver
Kidney
Sweetbread

COOKED MEAT

Any uncouked Group D item (bone in or boneless), when cooked.
Leaves made from chopped or minced meat. Cooked meats, jellied meats, in loaf form or otherwise (excepting those cooked or jellied meats listed in Group D).
Bologna
Wieners
Sausage, Smoked or Cooked

GROUP D - 2 1/4 LBS. PER COUPON - 5 OZS. PER TOKEN

BEEF—Fresh or Cured

Short Ribs, Braising *bone in*
Plate Brisket *bone in*
Brisket Point *bone in*
Round Bone Shoulder Roast *bone in*
Blade Roast *bone in*
Chuck Roast *bone in*
Shank, Frontquarter, Whole *bone in*
Shank Knuckle End *bone in*

VEAL—Fresh

Shank, Hind *bone in*

Leg, Long Cut *bone in*
Leg, Short Cut *bone in*
Leg, Shank End *bone in*
Loin, Full Cut, Flank on, Kidney and Suet out *bone in*
Flank *bone in*
Blade Chop or Roast *bone in*
Brest *bone in*
Shank, Front *bone in*
Neck *bone in*
Forequarter, Whole, 7 Rib Bones *bone in*
Rack, Whole *bone in*
Rack, Shoulder off, Knuckle Bone out *bone in*

SAUSAGE—Fresh or Cured

Pork Sausage
Commercial Sausage

LAMB or MUTTON—Fresh

Leg, Full Cut, Whole or Half *bone in*
Leg, Short Cut *bone in*
Loin, Whole, Flank on, Kidney and Suet out *bone in*
Loin Rib Roast or Chop *bone in*
Flank *bone in*
Forequarter, Whole or Half *bone in*

Rack or Shoulder, Neck on *bone in*
Rack or Shoulder, Neck off *bone in*
Rack or Shoulder Chop *bone in*
Neck *bone in*
Brest *bone in*

PORK—Fresh

Picnic, Hock on *boneless*
Loin (rind on), Whole Pieces or Chop *bone in*

PORK—Cured

Dry Salt Long Clear *boneless*

Dry Salt Short Clear *boneless*
Dry Salt Back Bacon *boneless*

PORK—Smoked

Picnic, Hock on *bone in*
Jowl

COOKED MEAT

Any uncouked Group E item (bone in or boneless), when cooked.
Brawn or Headcheese
Liver Sausage, all types
Blood Sausage, all types
Cretons Francais

GROUP E - 1 LB. PER COUPON - 4 OZS. PER TOKEN

OUR COMPLETE
SHORT STORY—

Fire And Water

—By—
SEYMOUR RICHIN

McClure Newspaper Syndicate

Joe found Lenny still in bed. It was four o'clock in the afternoon so it looked funny.

"What's the matter with you?" Lenny turned his head slowly, jerkily, and with considerable care. His face and neck were a bright and painful red. "I'm sick," he said.

"Don't be stupid, Lenny. You can't afford to be sick. Not now. You've got an important job tonight. Joe stared at Lenny's face and frowned deeply. "Hey, What-? He stepped closer and peered down. "You're burning up!"

"Sunburn," Lenny mumbled. "Pretty bad."

"Sunburn?" Joe gave a low whistle. "Sunburn? You gave a lot to whine."

"I'm on fire," Lenny said, keeping his body rigid. "I can't move. Went down to the beach yesterday. Fell asleep." Lenny tried to lift his arm but stopped with a low cry. "Gee, but it hurts."

"On, my Lord! Of all the things to happen!" Joe dropped down into a seat. "Lenny, you need a nurse. Sunburn! I suppose you forgot that tonight is Violet's sister's wedding and you're one of the ushers."

Lenny's eyes widened. He made a violent effort to rise to his elbows but fell back, face twisting, and breath coming in painful gasps. "That's right, Joe, it is tonight. I did forget!"

Joe was sarcastic. "I'm glad you woke up. Now you can go to sleep again."

"Go to sleep?" Lenny screamed. "You must help me, Joe. I've got to get into a soup and fish! And fast! I promised Violet I'd be there. She'll never look at me again!"

"Take it easy," Joe advised. "How can you climb into a boiled shirt now? Remember the stiff collar with the sharp edges? You'll pass out before you take a step."

Lenny looked at Joe with horrified eyes. "What'll I do? I've got to get to that wedding. Violet, Joe, I'll lose her. You know how girls are about these things. I'll look like a heel. If I don't go, I'm sunk."

"Not sunk?" Joe corrected acidly. "Control is the word. And DON'T you deserve it. Sleeping on a beach! Good Lord, and I thought you didn't like beaches!"

"I don't," Lenny said. "Ever since last year, I'd much rather play handball than bathe. It was Stanley Winsett's idea. You know, the lawyer."

"The snake, you mean. I never liked Stanley Winsett. And in case you don't know it, he's been hanging around Violet lately."

"What?"

"Don't beat a hung Stanley is looking to win your girl friend. So beware." Joe was about to say something else but he didn't. A queer light came into his eyes and he leaned over his friend. "Ray, Lenny, did you tell Stanley about the wedding tonight? Does he know you're supposed to be an usher?"

"Sure. All the fellows know."

Joe straightened up. "Stanley's out to queer you, Lenny. Ten to one he took you down to the beach on purpose, got you good and sunburned to keep you out of a soup and fish."

"Yeah. I ought to sock him. I told him to wake me up if I got too hot. But he let me."

Joe smashed his fist into his palm. "Sure. He's pretty sick. You're a

blond guy so he knew you'd stizzle under the sun. After tonight he'll figure Violet is through with you and she's got her."

Lenny's eyes blazed. "Till—"

A phone ring interrupted him. Joe picked it up. "Hello. Who is this?"

"Stanley Winsett." Joe shot a sharp glance at Lenny. "It's Stanley!"

Joe covered the mouthpiece. Yeah, Says he's got some interesting news."

"Let's hear it," Lenny said. "Drop down closer to the bed, Joe."

Joe did so. "Hello, this is Joe, Lenny's sick. I'll take the call."

"Fine." The voice came over loud enough for both to hear. "Tell your pal to forget about Violet, Joe. I've just called to tell her about his sunburn. She was quite upset. Said something about a wedding and a promise."

Stanley's smug laugh came over the wire. "Violet asked me whether I had seen Lenny. I told her I saw him with a pretty girl on a raft a few hundred yards offshore."

Joe was about to shoot something but Lenny shook his head for silence. "I said," Stanley continued, "that being all alone on a raft with a pretty girl, way out in the water, would take any man's mind off the sun."

Stanley's mocking snicker was followed by a sudden sharp click. "He's hung up," Joe said slowly.

"The rat. Boy, that's the fanciest double-cross I've heard of in years. A raft and a girl. That'll take some tall explaining."

"No, it won't," Lenny said, after a pause. "You're crazy. Violet won't see you now in a million years."

"I expect," Lenny said with a strange smile, "that she'll be here in five minutes. That Stanley was so smart for his own good." He looked at Joe. "That stuff about me being on a raft with a pretty girl?"

"There was a buzzing in the room. Push the button near the door, will you, Joe? That's the downstairs bell. Violet, no doubt. Coming to see she doesn't believe a word of Stanley's story."

"I'd love to know that you're talking about, Lenny."

"That business about the raft a couple of hundred yards offshore. Do you think Violet will believe that? I almost drowned last year which is the reason I dislike beaches. Yeah, I can't swim. Not one single stroke!"

Start Great Sweep

British Miners Have Big Job Of Cleaning Coastal Waters.

One hundred British mineworkers have begun the greatest sweep of the war, clearing the vast defensive mine barriers built round the shores of Britain to protect coastal shipping, the admiralty announced.

A total of 100,000 moored mines were laid in these barriers during the war and although some broke away in gales and drifted ashore, thousands remain. In addition, hundreds of Axis mines lie outside the main wartime channels which were set swept during hostilities.

Since V-E day more than 2,600 mines have been hauled to the surface. Navy mineworkers cleared them at the rate of 300 to 250 a week.

Java and Sumatra are among the most volcanic regions of the world.

FISHING IS CANADA'S NATIONAL SPORT—Canada's fine fishing grounds are great tourist attractions and visitors come from all over for the sport. The beauty that Peggy Monahan displays here was caught after a real struggle. U.S. tourists in Ontario are permitted to send a day's legal catch home but many go far beyond that and ship back large catches for sale against regulations.

IN SIMPLE TERMS

What Atom Is Has Been Described By A Layman

Here is a layman's description of the scientific terms which have been variously used in discussions of the atomic bomb which was dropped on Japan:

Atoms are the units of all matter is made. There are 92 different kinds of these atoms, one of each of the 92 chemical elements. These 92 elements range from hydrogen, lightest in weight, up to uranium, which is the most massive. In between lie carbon, tin, gold, radium and all the other known substances in the universe.

Every one of these 92 different kinds of atoms is made of exactly the same kind of small particles. The only difference between one atom and another is in the number of particles. Hydrogen, for example, has three particles and uranium more than 100.

The particles are electrons, which are negative bits of electricity, protons, which are positive bits of electricity, and neutrons, which have no electrical charge. Protons and neutrons both are nearly 2,000 times heavier than electrons.

Every one of the 92 atoms is made in the same pattern. Each one has a centre like the sun with electrons circling around it as the earth and other planets circle around the sun.

The atom's sun is made up of protons and neutrons. The particles in each atom are held together by electrical attraction. These forces of attraction are relatively tremendous.

They are so great that it is almost impossible to damage an atom of any kind.

Splitting or smashing an atom means an attempt to knock out some of its electrical, or non-electrical, particles. This splitting is done by directing rays of millions of volts in electrical energy against atoms as targets. The rays usually are made of some of the particles that compose an atom, that is either electrons, protons or neutrons. Sometimes X-rays will damage an atom.

Smashing an atom is a misnomer. Atoms are so tough that no atom has been smashed by human means. The best that has been done has been to knock a few of the particles out of an atom like chips chopped out of a tree.

Only one atom has ever been split. That atom is uranium 235. Uranium atoms when bombarded by the right kind of neutrons break into two nearly equal parts.

When uranium splits in two, some of the electrical attraction that held it together is given off in the form of electrical energy against atoms as targets. The energy which makes the present atomic bomb.

HEAVY EXPORTER

During the period of the European war Canada's status rose to second place among world exporters. With about four-fifths of its forested land consisting of wartime commodities—timber and pulp—its exports in 1944 increased more than 27 per cent in value over 1939, and combined exports and imports more than 300 per cent.

Colored lenses in eyeglasses have been used since the middle of the 16th century.

FISHING IS CANADA'S NATIONAL SPORT—Canada's fine fishing grounds are great tourist attractions and visitors come from all over for the sport. The beauty that Peggy Monahan displays here was caught after a real struggle. U.S. tourists in Ontario are permitted to send a day's legal catch home but many go far beyond that and ship back large catches for sale against regulations.

Interesting newswatch: At Empress, Alta., the Canadian Girls in Training have celebrated their 25th year of continuous organization, which they think is a record in Canada for any group.

The farm owned by Rutherford McQuibham in Lanark County, Ontario, has been in possession of the one family for 124 years, the first originally named out of primal wilderness. . . . The farm, Ont., Guide-Advertiser spoiled the report of a beautiful wedding by reporting "the roses were pink."

apologized, the intention was to say "the roses were pink." . . . Rattlesnakes are numerous in parts of Alberta this year, gradually working their way north from hants along the Milk River; two Medicine Hat citizens were bitten while working in their gardens recently. . . . British Columbia bears reports that Blood, Stewart & Welch Ltd., will build a new pulp mill near Port Alberni, for a sulphate pulp to manufacture rayon.

Even better than a hole-in-one was the fact that two Powell River, B.C., residents got perfect 29 holes in eighteen. Hugh Scott being one, while last July Sam Jackson was so favored. . . . Mrs. J. Bacon of Midland, Ont., has an ambitious Christmas tree which has started its third blossoming this year. . . . Another Jersey cow in the herd of J. P. Norrie, Turro, N.S., wins honors for her junior 2-year-old record of 7,640 lbs. of milk, 420 lbs. of fat in 30 days with an average test of 5.62 per cent.

her sire to be soon announced as Superior 8ire, first developed in the Maritimes. . . . Henry Camidge of Amabel Twp. in Ont., has nine acres of fall wheat over six feet tall.

Post-war expansion: Pembina Mountain Clays Limited have completed installing new equipment for drying and pulverizing clays from the Powder River for the production of bonding clay used in moulding sand, which in turn is used in steel foundries.

The additions to this plant may be valued at \$150,000. . . . More activating plant for the bleaching of clays used in oil refineries, and also in the refining of edible oils for packing houses.

Atomic, maybe: The possibility of growing two crops in the one field at the same time looks up to revolutionize the agricultural world. Washington, D.C., has started a \$100,000 project to test the possibility of growing potatoes with no tops at all. He planted a field of spuds in April, a quarter of which didn't grow. Then investigating recently he found that a number of Katabella brand he planted were providing new potatoes some of which were as big as hens eggs, although no signs of stem stalks.

Community support: On the night of July 21 at Liverpool, N.S., some 3,500 people streamed through the hall park gates for the hospital fund, and it is on record they spent a thousand dollars an hour. Thompson got the signal and in just 22 hours before hand built, furnished, decorated and wired eighteen booths for the affair.

Steeplanship: Gunner F. J. McAuland, a prominent rough rider before the war, dropped in on the Patterson Bros. stampede missing the first two days, so he wasn't eligible to ride. He was spilling for a ride after being overseas, so the stampede manager hearing about it, put it up to the other cowboys. They said: "Sure, let him come into the finals as if he had been right through from the start." He won two prizes. This was at Grand Prairie, Alta.

Who says weekly editors are prone to hardbitch. Here is a bit from the Kelowna, B.C., Courier-Breeze. "The weekly is food for the soul. To sit on a hilltop and survey a valley below is one of the most satisfying pleasures there are. In one sense, it stimulates the ego as it did with the man who wrote 'I'm monarch of all I survey.' Nature is sublimated and heat at man's length, nothing challenges man's supremacy. In another way, to take a long look over the powerful landscape is soothing and lends itself to musing thoughts and the untroubled enjoyment of solitude or companionship."

SPREAD OF DANDELIONS

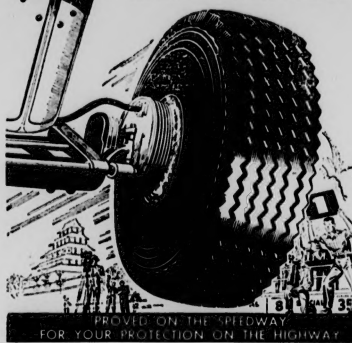

Canada had no dandelions before the arrival of the white man. The weeds came as stowaways on the first ships to land on these shores. Their phenomenal spread is due to nature's unaccountable determination to multiply the plant on a massive scale. Every minute seed in that large head has its own parachute ready to be launched by the first breeze to be carried by the million over the landscape.

Before the crusades, sugar was not known in northern Europe. 2631

Firestone

SAFETY PROVED ON THE SPEEDWAY
AT 100 MILES PER HOUR!

Imagine the punishment these tires took in this grueling, torturing test of tire safety and endurance as Wilbur Shaw, the famous race driver, under supervision of the American Automobile Association, averaged 100.31 miles per hour for 500 miles on the Indianapolis Speedway—equal to 50,000 miles of ordinary driving. Not a single skid or blowout occurred in the entire 500 miles—at speeds up to 135 miles an hour—definite proof that Firestone Synthetic rubber tires will stand up to any demand you can make of them! Remember this fact when you buy new tires.

Canada's Northland

Arctic Considered One Of The Most Promising Areas On Continent

Dr. Ruth Gruber of Washington, field representative for the department of interior, said Canada would do well to encourage more people to live in her Arctic northland because it is one of the most promising areas on the continent.

Dr. Gruber will travel from Edmonton to Fairbanks by road and make a detailed report to Washington on the post-war possibilities of the north.

Canada is doing a good job in opening up its north country. Dr. Gruber said, but there is a definite need for a much larger population before the real possibilities of the country are in full use.

SELECTED RECIPES

"ORANGE COFFEE CAKE"

1 cup sugar
1 egg, well-beaten
2 teaspoons grated orange rind
1/4 teaspoon almond extract
1/4 cup sifted flour
2 teaspoons baking powder
1/4 cup orange juice
1/4 cup milk

1 cup corn flakes
2 tablespoons sugar
2 teaspoons grated orange rind
1/4 teaspoon allspice
1 tablespoon melted butter

Blend creaming and sugar thoroughly. Add egg; beat well. Stir in grated rind and flavouring. Sift flour, baking powder and salt together. Add to creamed mixture alternately with orange juice and milk, being very careful not to overmix. Spread in greased baking pan.

Crush corn flakes into fine crumbs; mix with sugar, orange rind, allspice and butter. Sprinkle over coffee cake. Bake in moderate oven (375 deg. F.) 20 minutes.

Yield: 9 squares (8 x 8-inch pan).

ENCALLOPED CORN WITH CHEESE

1/2 cup cream style corn
2 tablespoons chopped celery
2 tablespoons minced onion
1 teaspoon salt
2 cups whole wheat flakes
1 egg
1/4 cup milk

1 cup melted butter or shortening
1/4 cup minced onion
Combine corn, celery, onion and salt. Place in casserole in alternate layers with whole wheat flakes and cheese, resting about 1/2 cup whole wheat flakes. Beat egg; add milk and melted butter; pour over top. Cover with remaining whole wheat flakes and sprinkle with paprika. Bake in a moderately hot oven (400 deg. F.) about 30 minutes.

Yield: 6-7 servings (8 1/2 inch casserole).

EFFECTIVE WEAPON

Blowguns up to 10 feet long, made of rigid native woods, have been used by primitive savages on Borneo, Palawan, Sumatra, endemic to the Philippine islands, to kill birds and beasts for food.

More than 20,000,000 books were lost in Britain during air raids.

Proper Food

Teaching Our People What To Eat, Is War Lesson

One of the lessons learned from the war was that great numbers of our people have been suffering from some form of malnutrition and because of this many young men who offered their services to the armed forces were rejected on account of some physical condition which made them unfit for war duty. Even in New Brunswick it was found that hundreds of our people, including many who were farm dwellers, had been lacking in enough of the right kind of food. Now it is hoped to change this by teaching them what to eat. —Saint John Telegraph-Journal.

Canada is doing a good job in opening up its north country. Dr. Gruber said, but there is a definite need for a much larger population before the real possibilities of the country are in full use.

Canada is doing a good job in opening up its north country. Dr. Gruber said, but there is a definite need for a much larger population before the real possibilities of the country are in full use.

LOCAL NEWS

—For painting and repair work apply to C. Rapin, East Didsbury, 11

Mr. and Mrs. Roger Barrett were visitors to the Coultis, Alberta, district last week end.

"Dough Girls" with Ann Sheridan, Alexis Smith, Jack Carson, Jane Wyman is the picture showing at the Didsbury Opera House on Thursday, Friday and Saturday, September 13, 14 and 15. On Monday, Tuesday and Wednesday, Sept. 17, 18 and 19 the feature will be "Where Do We Go From Here, in technicolor, with Fred McMurray, Joan Leslie and June Haver.

A few weeks ago we reported that Miss Betty Kinick had won a Mt. Royal Scholarship. We now learn that at the same time two other Didsbury girls won Mount Royal Scholarships. They were: Miss Irma Reinhardt and Mill Louise Bateman.

Mr. and Mrs. L. I. Gabel arrived in Didsbury last week from St. John's, Newfoundland, and are visiting with Mr. and Mrs. Harry Gabel.

Miss Ruth Gabel left last Sunday to take up her duties at a medical clinic in Vancouver as X-ray technician.

Tom Johnson and Russell Ady, accompanied by a friend, were out to the Fallen Timber on Labor Day and report a catch of 20 fine Loch Leaven trout. They had three that weighed over three pounds, and over two pounds, and ten that tipped the scales over one pound.

—Meet your Foundation Garment Requirements the Spirella way. Individually designed for support, style and durability. Your Corsetier, Mrs. Dora Ausmus, Olds, Alberta. Phone 320. 21p

Mrs. Oelke of Bowden returned home Monday after visiting for a few days with her friend, Mrs. Maude Hughes.

Mr. and Mrs. W.K. Nelson and sons Robert and Billy, and Mrs. W.O. Hieland, all of Vancouver, B.C., are visiting with Mr. and Mrs. Erven Rodney. Robert has just returned from overseas after five years' service with the Canadian-Scottish Army. Mr. and Mrs. Nelson and family will make their home in Didsbury. Mrs. Hieland will visit with her sister, Mrs. Rodney, who has been on the sick list for the past few weeks.

Word has been received by Mr. and Mrs. W.A. Austin that their daughter Elizabeth, who has been with the RCAF (W.D.) is being invalided home from England.

EVANGELICAL CHURCH NOTES

On Sunday, Sept. 16th at 10:30 a.m. the theme will be "A Good Man's Blunder." Sunday school will be held at 11:30 a.m., and at Bethel at 2 p.m. The Bethel church service will be at 3 p.m. The Youth Fellowship will have charge of the evening service when the pastor will speak on the subject, "The Prophet's Mantle." We extend a cordial invitation to all to attend these gospel services.
